

**Deliver this message to your Station Engineers  
and Master Control Operators**

## **PitchBlue® Satellite Transponder Change Announcement**

**Due to the C-Band Repack, PitchBlue® is moving to:  
Galaxy 19 Transponder 23**

**4160 MHz. VERTICAL down (the polarity is NOT changing)  
990 MHz. L-Band**

**All other parameters and services (channels/PID  
assignments) are identical and are NOT changing**

**DUAL ILLUMINATION IS ACTIVE AT THIS TIME**

**Your MagnuBox® appliance will be remotely retuned during  
a maintenance window – there will be no station impact**

**IRD Users MUST RETUNE THEIR RECEIVERS and are  
URGED to do so NOW!**

**PitchBlue® Satellite deliveries on G19 – T21 will end on  
February 19, 2022**

**\*This does not affect satellite feeds on Galaxy 19/ Transponder 10 C band**

**Please direct any inquiries to the PitchBlue® Operational Support Center:  
866-437-BLUE (866-437-2583) or [www.managedlinearsupport.com](http://www.managedlinearsupport.com)**
