EPISODE #: OA-NTA-LC0207 NORTH TO ALASKA "FLATHORN LAKE II"

A common complaint about pike is that they are really bony fish. That's not entirely true; they don't really have more bones... but their bones are shaped like 'Y's. So when you have a batch of pike this big, you better know what you're doing when you go to filet them. This week on NAPA's North to Alaska, you'll see how it's done.

	Segment Time
